

The Joint Action on HIV and Co-infection Prevention and Harm Reduction (HA-REACT) addresses existing gaps in the prevention of HIV and other co-infections, especially tuberculosis (TB) and viral hepatitis, among people who inject drugs (PWID).

The HA-REACT Joint Action is carried out by 23 partners from 18 EU Member States, the focus countries being Latvia, Lithuania, Hungary, Czech Republic and Poland. However, materials developed as part of the Joint Action will be of benefit to the entire European Union.

HA-REACT Materials, November 2018

E-Learning training tools on **HIV and HCV rapid testing in low threshold settings, Opioid Substitution Treatment, Naloxone-on-Release, Needle and Syringe Programmes in Prison and Condom Distribution in Prison.**

e.harmreduction.eu

Training manual on HIV and HCV rapid testing in low threshold settings for PWUD is a complete tool to provide staff in low-threshold settings the knowledge, skills and techniques needed for testing people who use drugs for HIV and HCV and linking them to needed care.
